

BASEMENT 63

Escalating the notion of industrial packaging through the anti-material. The artist and curator examine the ready-mades of factory leftovers and their potential to become the desired spectacle. Sculpture acts as a cocoon for these discarded forms and their shadows take on the role as a light barrier within the space.

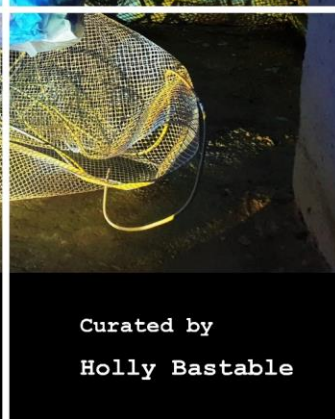

Unfortunately, there is no disabled access at the gallery.

This exhibit questions the unassuming, discarded material's aesthetical status. By projecting mechanical factory processes upon these forms, it visually transforms the materials through their original implied functionality. Everything in the space is synthesised and choreographed by the compositions in industrial environments.

Factory assembly-lines, plastic colour strips being fed through machines and industrial storage have inspired both the artist and curator in designing this exhibit. They aim for a visual spectacle whilst retaining the origin of the materials.
