

# BASEMENT

63

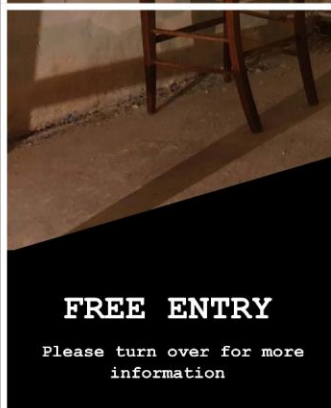

(Un)familiar Functionality invites the viewer to challenge their understanding of everyday objects and forge new connections through the use of appendages. Pink works around the idea that extensions can allow for an object to transform and redirect purpose. 'Touch' is explored as a playful re-direction that can be transferred from an object to the end point of an extension.

Unfortunately, there is no disabled access at the gallery.

Please turn over for more information

"The cane becomes an intimate prosthetic device that withdraws into the sensorium of the body."

Pink explores disseminating ideas of alterations, extensions and modification of familiar, used everyday objects through the abuse of functionality.

# BASEMENT 63

This exhibition contains flashing lights and bright colours, if you have any concerns or queries prior to visiting, please email us at Basement\_63@hotmail.co.uk

This exhibit consists of deformed mundane objects to invite the viewer to question their own familiarity with function and form. Pink uses a playful approach to balance, force, stability and permanence to re-invent, re-purpose and evolve through sculpture. Each sculptural element stands alone but they also relate, support and physically interact with each other.

## Visiting Us:

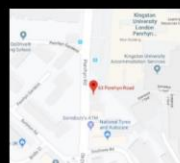

If you would like to visit any of our exhibitions please email Basement\_63@hotmail.com for visitor information and to book a free viewing appointment, or to attend one of our private views.

Alternatively, visit our website to view all the exhibition films and photographs.

## How To Get Here:

### Address:
